MEMORANDUM

TO: MIAMI COUNTY COMMISSIONERS

DATE: March 27, 2009

FROM: Pat Turnbull

COPY: Doug Evans, Jim McGarry

SUBJECT: Bethel Township Water and Sewer

SWR WWTP

Below are the items that the County needs from Bethel Township to conduct Water and Sewer Project at their request in Bethel Township. Jim McGarry and I have tried to convey these points to Township Staff and Trustees in the past and I think it is important for the Commissioners to emphasize these to the Township as well.

- Progress must continue by the Trustees to complete their Comprehensive Land Use Plan so that water and sewer demands can be established.
- The Commission needs formal, written requests from the Trustees for water or sewer extensions if the projects are not initiated by property owners, Ohio EPA, or the Health District. = *and it was not initiated by them - only by Trustees*
- If the Trustees request a project, they also need to justify and support their request to the public. *i.e. Public mtg will be assessments ← in original*
- Once it becomes clear how much a system will cost - Commissioners will be looking for the Trustees support for assessments and your financial participation on upsizing.
